INTRODUCTION

As part of its activities within the 4PLUS project, the Urban Research Institute (URI) has developed the door-to-door identification of PWDs in the Municipality of Kolonjë, in very close cooperation with the social services staff in the Municipality. Following this survey, a GIS-enabled Decision Making Platform has been developed by PB2 - Regional Union of Municipalities of Ionian Islands, in close collaboration with the expert contracted by URI.

Furthermore, the list of activities conducted in the frame of D4.6.2 – GIS-enabled Decision Making Platform from the expert are:

- Close cooperation with Regional Union of Municipalities of Ionian Islands - PB2 (from the Greek partners) for providing inputs for the common GIS-enabled Decision Making Platform.
- Close cooperation with relevant stakeholders and experts from Kolonja Municipality to gather input for the completion of the platform.
- Populate the GIS QGIS platform with data gathered from the door to door identification.
- Review and edit data to ensure completeness and accuracy of information.
- Provide translation in English of the data collected share the collected data report with Regional Union of Municipalities of Ionian Islands - PB2.
- Review the produced materials, for the development of the GIS-enabled Decision Making Platform.
- Reporting in English.

SCOPE OF WORK

Following a “Door to Door Identification of PWD in Kolonja Municipality” conducted in the frame of this project, namely D5.6.2, a GIS platform¹ has been created, being populated with PWD data and their geographic distribution in Kolonja Municipality, as reflected in the following:

<https://gisapps.eu/#web-map>

<https://gisapps.eu/viewer.html>

<https://4plus-project.eu/en/partners>

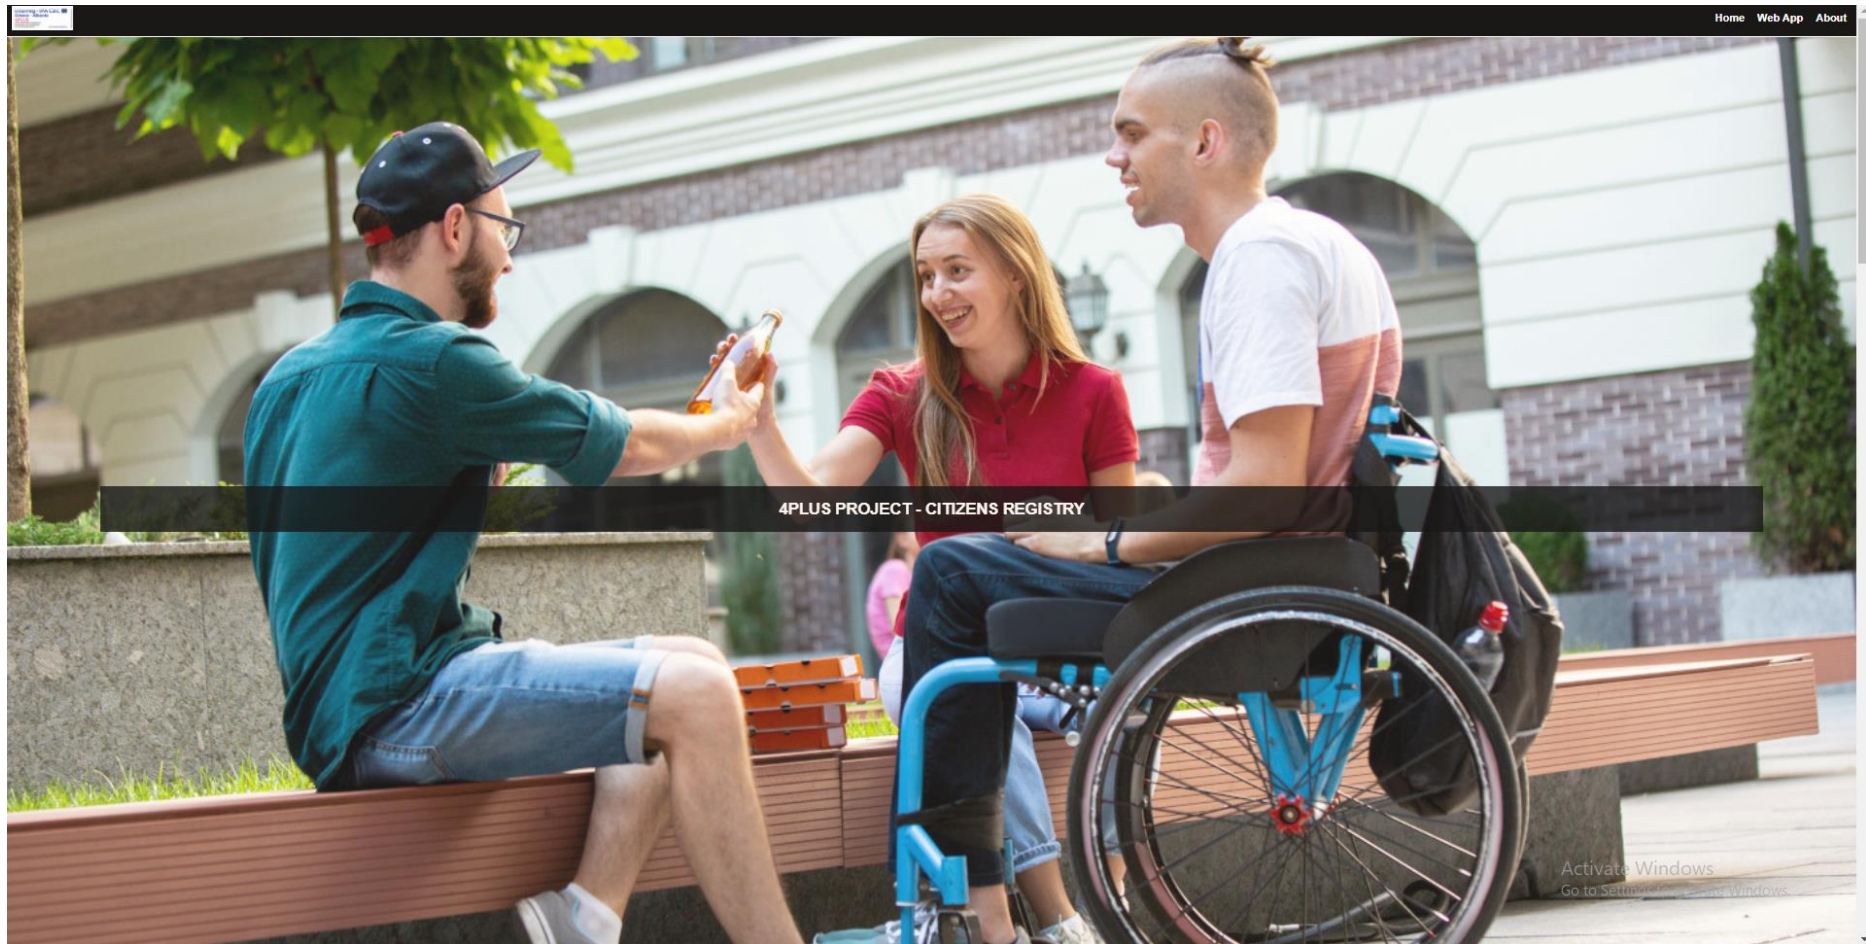

This platform will be further updated and used by the Municipality; and at the same time, individuals, residents in the municipality and/or traveling to it, will have the possibility to integrate data into the platform regarding the accessibility of a road and/or place in Kolonja.
